## PROJECTS

**Incident Radar - Agentic Incident Recovery** | Next.js 15, Supabase, Workato, Claude, Slack — incident-radar.onrender.com

- Correlated raw telemetry into incidents with LLM root-cause triage; a policy engine routes fixes as ACT, ASK or NOTIFY via an allow-listed, idempotent gateway.
- Required 3 consecutive healthy samples before resolution and issued SHA-256 tamper-evident recovery receipts.

**MemOS - Long-Term Memory for Local LLMs** | FastAPI, PostgreSQL, Qdrant, Neo4j, Redis, Ollama, Docker

- Built a privacy-first memory layer with 768-dim vector search, knowledge-graph extraction, importance decay and conflict resolution.
- Added Redis embedding cache, JWT auth and automatic SQLite fallback for Docker-free deployment.

**EscrowAI - Freelance Escrow on Cardano** | Next.js 16, Express.js, PostgreSQL, Prisma, Aiken

- Wrote a Plutus V3 validator enforcing payout routing, deadlines and signatures on-chain, with an optional AI oracle for release.

**Real-Time Quiz Platform** | Next.js, Socket.IO, PostgreSQL, Redis

- Supported 150 concurrent players per room with session-token auth, presence tracking and polling fallback.
